

# CAPS "The Common Automotive Platform Standard"

Claims Analysis Report Wk. Ending 20/03/2021

#### Claim Definition (CAPS Analysis)

#### **Unique Claims**

A claim that is initiated and exchanged for the first time within the CAPS System "The primary count"

#### **Supply Chain Transmissions**

The Unique Claim plus any additional transmission on the same exchanged claim, e.g. notification to a parts Vendor

Information enclosed is CAPS data exchanged across the platform, which may be similar to claim trend data throughout the UK

### CAPS "Weekly" exchange synopsis

This new weekly report will show claim volume trends from the beginning of lockdown 2.0 and through LD 3.0 as a percentage of claims measured against the peak, Wk. ending 07-11-20

The analysis will reveal throughout Jan, Feb and into Mar-21 a return to operational activity, where statistics continue to display another small upward increase in Unique claims exchanged.

Some of the factors reported to be causing fluctuations are;

Bodyshops reporting continued reduction in workforce due to flexi-Furlough

Schools re-opening across the Country wk. beginning 8th March 21

Traffic analysis starting to show an increase in peak trends

CAPS Measures claims exchanged and not necessarily the frequency of "New Claims" indicating a weekly lag between newly reported Vs exchanged claims?

Regional Measurement analysis using the UK Postcode regional database by identifying each Bodyshop location exchanging data.

Unique Transmissions

Lockdown Period 2.0

We end in E 2 1 1 2 We end in E 2 1 2 W
